September 4, 2018

Fellow Club Officer,

My name is Dave Karash, I currently an officer at the Nighthawks RC club located in North Jackson. I'm writing this to invite you and any of your members to an event we are having on September 15th, start flying around 10am.

This event is going to be a small informal event to get the area clubs and their members together with the intent to just enjoy our great hobby. The price of admission is to bring your favorite side dish with a utensil. Our club will supply the hamburgers and hotdogs.

The other objective for this event is to present a possible idea that myself, and a few other club members have that, if we can organize, may benefit all the area clubs by promoting our hobby and increasing clubs rosters. I would like to take about 15 -30 minutes out of the day to explain our idea, then get some feed back from everyone.

A quick description of our idea. Basically consists of what we could call a RC fair. This would be an event held every year dedicated to educating folks that would like to start in RC aviation. We would publicly promote it. Invite the public to one of our fields. Have tables setup that show the equipment we use. Have a simulator available. Possibly have a buddy box ready. Plus have a few demo flights. This could be a great way to promote our individual fields too. I feel that a single club could have an event like this, but it would be much grander and fun if we come together as area hobbyist to put on an event dedicated for the public.

Sincerely yours,

Dave Karash
